Niche
Focus on female business owners

Use Case: Business Succession Made Seamless

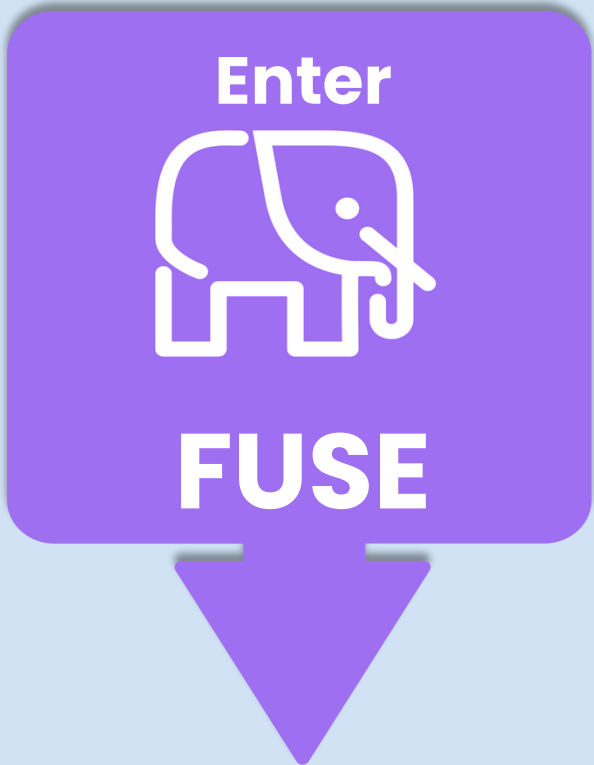

Meet Anna, 59
Anna runs a family-owned bakery in Zurich. After 30 years, she wants to retire but doesn't know how to find the right successor — and advisors charge CHF 200/hour and many months of processes.

ICP 1: SMEs business owners

Meet Leo, 28
Leo is a young entrepreneur, recently completed Oxford MBA looking to buy a small business so he does not have to build from scratch. He's frustrated by fragmented listings and hidden fees.

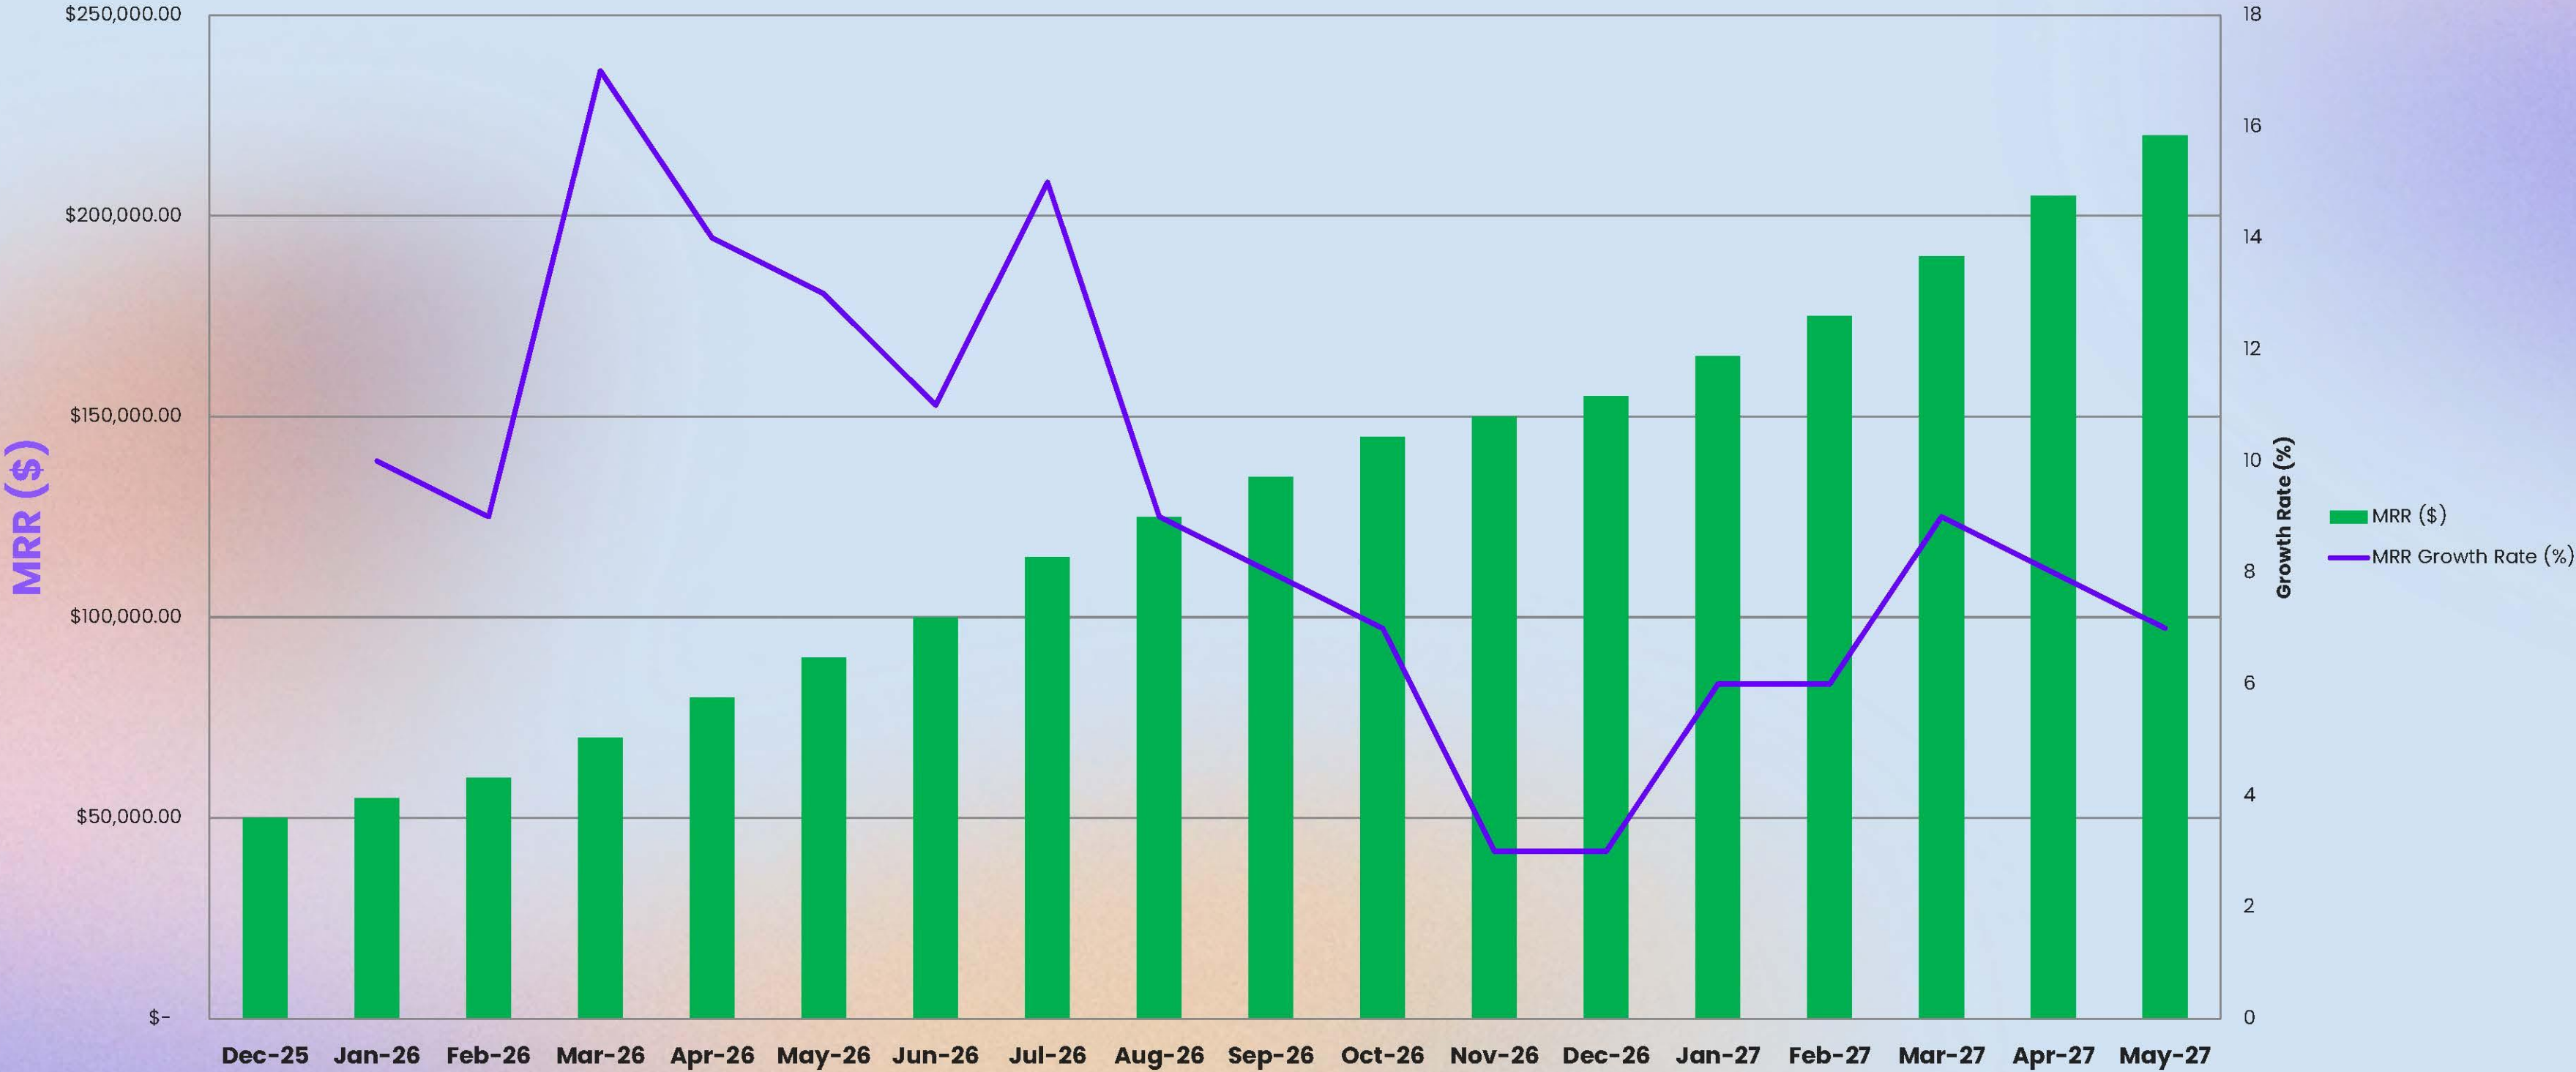

ICP 2: Entrepreneurs/buyers

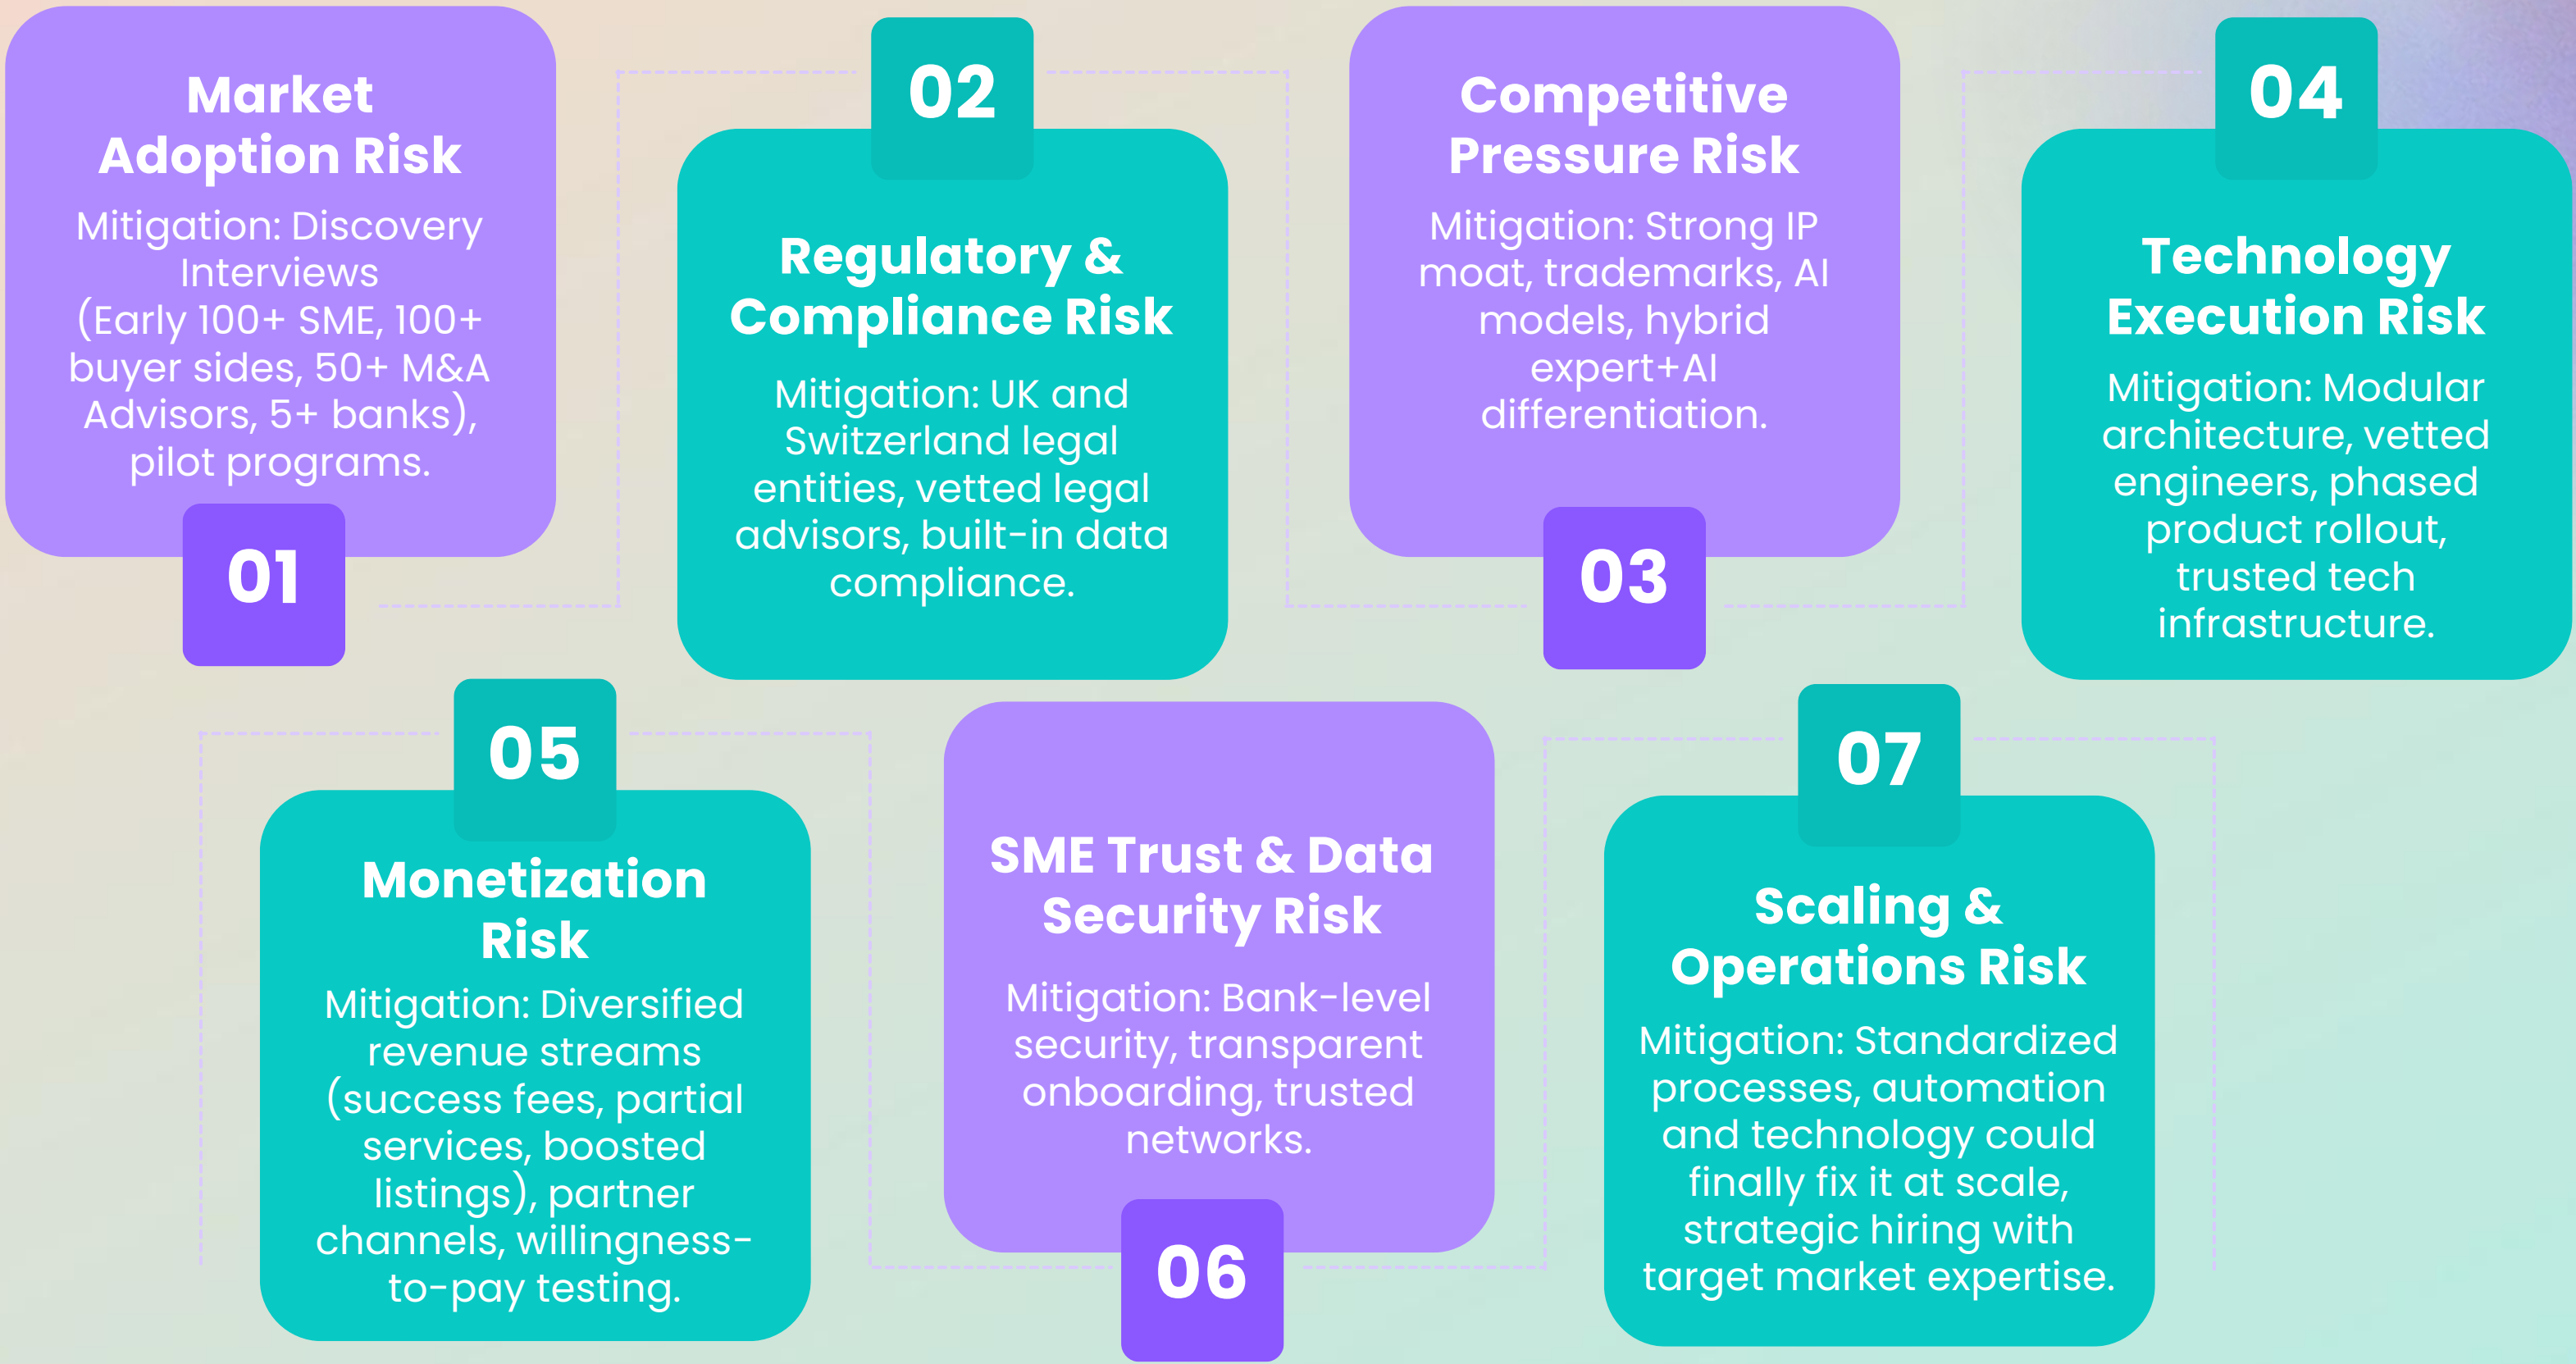

- Anna uploads her business details and gets an AI-assisted valuation reviewed by a human expert.
- Leo signs up, completes AML/KYC, and our AI-matching algorithm pairs him with Anna.
- Both can schedule calls, review verified advisors, and access automated due diligence tools. All in one transparent platform.
- Result: Anna sells her bakery smoothly, Leo becomes a first-time business owner, and a local legacy continues.
