Use Case: Business Succession Made Seamless

Meet Anna, 59

Anna runs a family-owned bakery in Zurich. After 30 years, she wants to retire but doesn't know how to find the right successor — and advisors charge CHF 200/hour.

Meet Leo, 28

Leo is a young entrepreneur, recently completed Oxford MBA looking to buy a small business so he does not have to build from scratch. He's frustrated by fragmented listings and hidden fees.

Anna uploads her business details and gets an AI-assisted valuation reviewed by a human expert.

Leo signs up, completes AML/KYC, and our AI-matching algorithm pairs him with Anna.

Both can schedule calls, review verified advisors, and access automated due diligence tools. All in one transparent platform.

Result: Anna sells her bakery smoothly, Leo becomes a first-time business owner, and a local legacy continues.
